

Without the images, the AI still finds all 15 racist videos but makes two false alarms

Qwen3.5-9B · 30 public videos (15 racist, 15 not) · speech + on-screen text only

		What the AI decided	
What a human decided		Flagged	Not flagged
Racist (15)	Not racist (15)	15 Correctly flagged	0 Missed
		2 False alarm	13 Correctly ignored

Short public videos, up to 4 minutes long. The AI used only the speech and the on-screen text (no images). The video test uses racism because no open video dataset on sexual violence exists. With only 30 videos, each mistake moves the scores a lot.
