

The two-step system catches 54 of 60 harmful memes while the AI judge sees only 73 % of them

Two-step system: fast pre-filter, then AI judge · 120 hand-checked memes

		What the two-step system decided	
What a human decided		Flagged	Not flagged
Harmful (60)	Harmless (60)	54 Correctly flagged	6 Missed
		4 False alarm	56 Correctly ignored

Two-step system: a fast pre-filter looks at each image first and passes only suspicious memes to the AI judge (Qwen3.5-9B). The pre-filter set aside 2 harmful memes and the judge missed 4 others; false alarms stay at 4. The judge uses the improved version of our definition (indicative only: tuned on these memes).
